

## BROADCAST SERVICES FOR COP28

### Satellite Services

**COP28 is providing a FREE OF CHARGE feed of selected content streams via Etisalat**

This is a single feed and therefore COP28 will programme the stream based on their expectation of demand. Feeds will be pre-presented by a slate detailing the event and the scheduled timing, so broadcasters are aware of the schedule. Please note, however, that timings and scheduling are subject to change.

The planned schedule is available on the UNFCCC website.

**Origin:** Master Control Room of COP28 Media Centre

**Signal specification:** HD-SDI 1080i with 8 channels of embedded audio according to SMPTE 292M

### Transmission details:

| IS-20 LM06C Slot E                    | G-19 18C- Digital Only Slot D     |
|---------------------------------------|-----------------------------------|
| Orb Loc: 68.5° E;                     | Orb Loc: 97° W;                   |
| U/L: 6088.5Mhz Vertical;              | U/L: 6296.6Mhz Vertical;          |
| D/L: 3863.5Mhz Vertical;              | D/L: 4071.6Mhz Horizontal;        |
